Damon Kohler

Tech Lead, Google Munich's cloud robotics team

Damon is tech lead of Google Munich's cloud robotics team. He founded Cartographer, an open source, real-time simultaneous localization and mapping (SLAM) library in 2D and 3D with ROS support as well as two other significant open source projects: rosjava and SL4A. He has been with Google for 12 years, the last 10 years of which were spent in Munich.

Damon earned a Masters in Computer Science from North Carolina State University, where he graduated with honors.
